

Made in the US with German Ingenuity

About the FALCO 20

The FALCON 20 has been specially designed with the safety and comfort of you and your horses in mind. The compact horse box for 2-horses drives more like a larger SUV and transports your horses with great convenience to your horse shows, clinics and training. You can choose from several chassis manufacturers to custom build your FALCON 20:

- Mercedes-Benz Sprinter (Diesel)
- Ford Transit (Gas), 4WD option available
- Dodge RAM ProMaster 3500 (Gas)

The FALCON 20 is far simpler to maneuver as a typically pick-up truck and trailer combination especially in tight turns or driving backwards in cramped horse event parking lots and hard to get out barn driveways. The design includes a large side ramp and open, spacious and bright interior for the horses. Optional equipped with air suspension for smoother ride as well with air conditioning for the well-being of your horses.

The sporty and slick appearance of the FALCON 20 integrates hidden ramp lifting mechanism to minimize the collection of mud and dirt and flush ramp latches. The interior has no step between ramp and floor and includes a solid divider design and cushioned walls.

FALCON 20 features and advantages:

- Ease of driving like a car
- Nimble in tight spaces
- No hitching on of trailer necessary – always ready to go!
- Simple to drive backward in tight spots

- Safer and smoother ride for the horses
- Can still be utilized to haul hay and other equipment (home improvements projects etc.)
- Up to 7,500 lbs towing capacity depending on chassis options

FALCON 20 specifications:

Cabin Area depending on Chassis Option:

- Seating for up to 3
- Heated seats
- Driver's seat with adjustable lumbar support
- Front Airbags
- Automatic gearbox
- Radio/CD player, USB port, Bluetooth, aux plug in
- Air Conditioning
- Satellite navigation
- Multiple storage compartments and cup holders
- Electric windows and mirrors
- Cruise control
- Monitor for horse interior camera and rear camera
